Aim & Scope

Melecon 2016 is an IEEE Region 8 flagship conference with a long standing history of excellence both in electrotechnology and in recent years in information and communication technologies as well. Melecon 2016 covers complementary thematic areas that hold great promise for the advancement of research and technological development in the solution of complex engineering systems. In this context, Melecon 2016 foresees to attract high quality papers and provide a platform for the cross fertilization of new ideas and know-how under the special theme of the conference that is Intelligent & Efficient Technologies & Services for the Citizen.

To achieve this, the conference encompasses the following thematic areas:

- Electric Power Systems and Renewable Energy Sources Chairs: A. Poullikkas, Cyprus University of Technology, Cyprus C. Sourkounis, Ruhr-University Bochum, Germany
- Information and Communication Technologies
 Chairs: S. Louca, University of Nicosia, Cyprus
 D. Banciu, National Institute for Research & Development in Informatics, Romania
- Internet of Things, Cloud-Based Systems and Big Data Analytics Chairs: C. Mavromoustakis, University of Nicosia, Cyprus
